## ABOUT US

---

**GORLY EQUIPMENT** was established in 2015 where our parent company Shenzhen Gaoli Aerial Work Equipment Co., Ltd expanded into Malaysia. We manufacture self-propelled lifts since 2007 and have delivered more than 5,000 units in China and countries around the world.

Currently we are working on establishing our self-brand Gorly in Malaysia and to create brand awareness in the Malaysian market. Our core services consist of sales, rental and machinery servicing for aerial work platform equipment such as Aluminium Scaffolding, Scissor Lift, Boom Lift, and Sky Lift.

With the continuous support given by our parent company in China, we are strong in our after-sales service together with a highly trained team of technical support as well as spare parts availability. Our standard SLA for response time to any breakdown of equipment are in within 12 – 24 hours.

Gorly Equipment also provides Ad-hoc services such as, Repair Service - Scissor Lift and Boom Lift, Renewal or Apply for PMA Certificates and also sourcing for Scissor Lift and Boom Lift's spare parts.

**YOUR SAFETY AT WORK IS OUR PRIORITY!**

**YOUR SAFETY  
AT WORK IS  
OUR PRIORITY.**

## PRODUCT & SERVICES

### AERIAL WORK PLATFORM

- >> Self-Propelled Scissor Lift
- >> Telescopic & Articulating Boom Lift
- >> Mast Lift / Personal Lift
- >> Aluminum Scaffolding (Access Tower System)

### AD-HOC SERVICE

- >> Repair / Schedule Maintenance Service
- >> Source & Supply
- >> Renewal or Application

---

## AERIAL WORK PLATFORM

### SELF- PROPELLED SCISSOR LIFT

Self-Propelled Scissor Lift is available in 2 models powered by Electric Battery & Diesel Engine. This product is designed for working at heights that required more working spaces and lifting capacity. It is also an alternative from traditional scaffolding.

- >> Improve workers safety, productivity & efficiency.
- >> Speed up work progress.
- >> Reduce overall cost.

## AERIAL WORK PLATFORM

### THE FEATURES OF ELECTRIC SCISSOR LIFTS

The electric scissor lift is mainly used indoor but can be used outdoors too within certain weather/ external conditions. There are several models of scissor lift providing various lifting heights from 4.20m to 15.80m working height. It is commonly being used in warehouses, shopping malls & office building.

#### Advantage :

- >> Eco Friendly. Minimal noise & Zero emission.
- >> Compact sizes easily to move around tight spaces.

### THE FEATURES OF DIESEL SCISSOR LIFT

The diesel scissor lift is a rough terrain machine equipped with 4x4 wheel drives. This gives greater drivability especially on constructions sites. It can be lifted up to 18.16m working height and 680KG lifting capacity.

#### Advantage :

- >> Longer working hours than electric scissor lift.
- >> Great Lifting capacity & much bigger working space.

## AERIAL WORK PLATFORM

### SELF-PROPELLED BOOM LIFT

Self-Propelled Boom Lift is available in 2 models, powered by Electric Battery & Diesel Engine. Additionally, it also comes in 2 designs as telescopic & articulating boom lift which caters for different working needs. It is an alternative solution for truck mounted lift (sky lift).

- >> Improve workers safety, productivity & efficiency.
- >> Speed up work progress.
- >> Reduce overall cost.

## AERIAL WORK PLATFORM

### THE FEATURES OF ARTICULATING BOOM LIFT

The articulating boom lifts comes with multiple boom sections (primary, secondary & tower boom) and suitable to work in both indoors & outdoors. The range of working height available is from 15m to 45m and lifting capacity up between 230kg to 450kg.

#### Advantage :

- >> Great Flexibility in accessing areas with obstacles & barriers.
- >> 360-degree rotatable turntable
- >> Drivable at full elevation, no outriggers required.

### THE FEATURES OF TELESCOPIC BOOM LIFTS

The telescopic boom lifts are engineered with single boom sections that lift & extend telescopically. It is commonly used for construction work such as façade work, structure work, roofing work and etc. The range of working height available is from 15m to 56m and lifting capacity up between 230kg to 450kg.

#### Advantage :

- >> Greatest horizontal outreach & shorter time required to reach the top
- >> 360-degree rotatable turntable
- >> Drivable at full elevation, no outriggers required.

### VERTICAL LIFT / PERSONNEL LIFT

The Vertical lift/Personnel lift is targeted for commercial buildings such as offices, shopping malls, airports and etc. where the accessibility of equipment is limited. The models available are between 8m to 14m working height and lifting capacity of 159kg.

- >> Compact size for easy maneuver
- >> Light weight to be fit into passenger lift

### Aluminium Scaffolding (Frame Type / K-Ring Type)

At times we come across places where our equipment is unable to access due to certain limitation. This is when Aluminium Scaffolding comes in handy with its flexibility in installation. Basically, there is no limit on height, width or length to it but rest assured that all the scaffold tower design are being carefully calculated by our engineers beforehand.

- >> We have a team of certified competence scaffolders for installation & dismantling job.
- >> Able to fulfill safety requirement at site such as competence scaffolders & green tags.
- >> Full flexibility and able to cope with different kind of site condition.

Apart from rental equipment, we also provide ad-hoc services to our customer related to aerial equipment. Service such as following,

# 01

## Repair / Schedule Maintenance Service

Customers engaged our services to repair & perform maintenance service for their aerial equipment as they have no expertise in managing it. Regardless of the manufacturing brand of the aerial equipment you have, our well-equipped technical teams are able to help you out.

# 02

## Renewal or Application for PMA Certificates

The PMA certificates are managed by government bodies JKPP and operating aerial equipment without valid PMA certificate is considered illegal. Our service covers,

- >> Pre-inspect on the equipment to assure it fulfill with JKPP requirement.
- >> Apply & submission of documentation for the equipment to JKPP.
- >> Schedule & Attend to JKPP Officer during machine inspection at site.

# 03

## Source & Supply Aerial Equipment Spare Parts

Equipment may fail or are unsafe to operate when there are faulty parts and it will be a nightmare when you couldn't find a replacement for it. Don't worry, we've got you covered.

- >> Supply parts for most of the brand such as Genie, JLG, Haulotte, Skyjack, Sinoboom & etc.
- >> Ready stock on most of the common parts.
- >> Short lead time with fast delivery from all over the world.
- >> Good quality parts with 1 year warranty on manufacturing defect.

05

## SERVICES LEVEL AGREEMENT

Gorly Equipment are committed to response & resolve in within 24 hours for any breakdown of our leased equipment. Cost of repairing such as labor, transportation, parts replacement will be incurred to customer when the breakdown of leased equipment was caused by customer negligence. Otherwise, all cost of repairing will be under our company expenses.

### BEFORE

PROCEDURES BEFORE EQUIPMENT DELIVERY

#### STEP 01 ORDER CONFIRMATION

Sales department to provide delivery order & send to Technical department.

#### STEP 02 PERFORM INSPECTION

Technical team will perform Inspection of the equipment as written on delivery order. A check list will be completed by our technical team to make sure equipment are in good condition.

#### STEP 03 DELIVERY TO CUSTOMER

Equipment that pass the inspection test will then be delivered to customer's site as written on delivery order.

### AFTER

PROCEDURES UPON EQUIPMENT RETURNED

#### STEP 01 CLEANING

Technical department to clean the equipment that has been returned to warehouse.

#### STEP 02 PERFORM INSPECTION

Technical team will perform inspection on the following aspect  
I ) Identify if there is any serious physical damage on the equipment.  
II ) Function test on equipment.

#### STEP 03 EQUIPMENT REQUEST

Equipment that pass the inspection will be put under release status to indicate as working in good condition and available for hire.

### EMERGENCY

PROCEDURES WHEN BREAKDOWN HAPPEN

#### STEP 01 COMMUNICATION

Technical team contact customer to get more information such as any leaking or warning indication on the equipment.

#### STEP 02 ANALYZE AND PREPARE

Technical team will have a quick discussion to identify the problem based on information obtained from customer. Prepare the tools and parts required to fix the equipment.

#### STEP 03 EQUIPMENT REQUEST

Technical team travel to customer site to perform investigation if issue was caused by human negligence. Test on the equipment to make sure it is working fine.
